DEPRESSION

cant see straight I'm so in pain

transfer hate to urethane

blinding speed is what I need

grind the coping till i bleed

falling into deep depression

no release of pure aggression

pressure builds and just wont lessen

till I go out and start to session

the fix is on an inclined plane

like an out of control train

my psychoanalysist is out in the street

my therapist is under my feet

falling into deep depression

no release of pure aggression

pressure builds and just wont lessen

till I go out and start to session

DEATH SKATE

footplant on you face

your brains splatter all over the place

pressure drop on your head

rip you apart till you are past dead

metal to flesh in a backside grind

from your neck

down your spine

extended frontside rock and roll

my front truck tears your butthole

skate you to death makes me feel good

leave you to die in a pool of blood

ollie pop to axle stall

kingpin hangup in your eyeball

got no knife, got no gun

but I got a skate and I'm gonna have fun

rip you to pieces, rip you apart

skate your kidneys and grind your heart
